

Mobley Industrial celebrates 30 years, expands

Mobley Industrial Services Inc.

This year is a milestone for multiservice specialty contractor Mobley Industrial Services Inc. as the company celebrates 30 years in business. Mobley is still family owned and operated and in its second generation. Company founder Jack Mobley serves as president, with sons Todd Mobley as vice president, managing field operations and Chuck Mobley as vice president, managing engineering and accounting operations. With each passing year, the business has grown bigger and stronger. In fact, 2008 was Mobley's biggest year in the history of the company!

Despite the recession, Mobley Industrial Services continues to invest in its business and industry, currently opening new locations in Corpus Christi and Beaumont, Texas, and Gonzales, La. Area managers are already in place, and the additional locations complement a restructuring of the company to assist in managing its workload more efficiently and seek new clientele.

"We feel that our company is successful among our competition because it is one of the few large family operated businesses left with a reputation of getting a quality job done safely, on time and on budget," Chuck Mobley said.

"We are also capable of making quick decisions, and we realize that our most important asset is our employees," Todd Mobley said. "We have many 20-year employees in the company, and we feel we maintain our employees in the way we leverage our project sites for personnel to man new projects."

The Mobley formula is a successful one. Plants nationwide are calling on Mobley to perform not just one but groups of services that the company considers its core competencies:

- Asset management.
- Coatings and linings.
- CUI.
- CUF (corrosion under fireproofing).
- Fireproofing.
- Grounds maintenance.
- Insulation.
- Janitorial.
- Lead and asbestos abatement.
- Scaffolding.

Mobley Industrial Services has spent its 30 years in the industry perfecting its work, fostering long relationships between the company and its clientele. Mobley's top executives' experience alone encompasses more than 100 years in the construction business. That high level of knowledge and expertise is expected of each Mobley team member.

"We respond to our customers' needs," Jack Mobley said. "Mobley's top management is always available to answer any question and explain every aspect of our service, how we intend to implement our recommendations and the effect it will ulti-

mately have on your facility *before* costly decisions are made."

Working with one contractor that can provide a multitude of services and excel at each one definitely has its advantages. Mobley Industrial Services knows your business and performs the work safely and cost effectively without compromis-

ing quality.

Whether it is through a national contract or an association award, Mobley Industrial Services knows that is the industry's way of recognizing the company's continued leadership as a superior service provider, and Mobley continues to hold itself to the industry's highest performance standards.

Mobley serves the petrochemical, power generation, pulp and paper, food and beverage, cryogenics and marine industries. Mobley Industrial Services can be part of your success story.
